

CONSTRUCTION UPDATE: Overlake Sewer Trunk Reconstruction Project

The City of Redmond is planning sewer construction work in the Overlake area along portions of Bel-Red Road and 152nd Ave NE. Construction is expected to begin in the summer of 2006.

Why is this project being done?

Sections of the sewer have reached or are quickly reaching capacity. A larger sewer is needed to handle current flows and anticipated sewage flows from future development.

When will the new sewer be built?

Construction is expected to begin in the summer of 2006 and take approximately 4 months.

What kinds of disruption are likely?

Traffic will be affected by lane closures and detours in the vicinity of construction activities. Sewers will remain in service during construction.

Where can I find additional information about this project?
